# Heathmont Denture Clinic Heathmont, VIC

**HEAT PUMP**

## SUMMARY

AREA UPGRADED  
**Dental Clinic**ANNUAL SAVINGS  
**\$2,000 P/A**CARBON ABATED  
**6.5 tonnes**WARRANTY SUPPLIED  
**5 YEARS**

As well respected healthcare professionals, Heathmont Denture Clinic rely upon a safe, reliable, and sanitary supply of hot water at their practice in Heathmont.

However, like all small businesses, they are also very keen to minimise their energy costs at a time when gas and electricity costs are at record highs.

Analysis of their energy consumption demonstrated that a significant proportion of their energy costs was associated with heating water.

## CHALLENGE & SOLUTION

Energy Makeovers Heathmont Dental Clinic's inefficient hot water heat pump.

We replaced their gas fired storage water heater with a **super efficient Midea split system electric heat pump water heater**.

This positive change will now save them around \$2,000 per year in energy costs and reduce their carbon footprint by approximately 6.5 tonnes per year.
