Ripponlea upgrades for the future

Based in Elsternwick, Victoria, the Rippon Lea Estate was completed in 1868. Originally built as a large farm, the mansion has since been added-to and now boasts 33 rooms.

The venue is a beautiful, historic landmark open for tours, parties, concerts, weddings and more.

The Challenge and the solution

Maintaining the aesthetic and current lighting systems at Ripponlea was an absolute necessity during their upgrade to LED. Energy Makeovers was able to maintain the traditional look of the iconic chandeliers by replacing the candle shaped bulbs with LED candle shaped bulbs that featured exposed filaments making them indistinguishable from the old Edison era globes the chandeliers originally housed.

This beautiful landmark can now boast LED lighting throughout the mansion and estate, including their chandeliers ensuring their lighting security for many decades to come.

Mansion + Estate **202** Lights upgraded **\$3,676** in annual savings

What this means...

37 barrels of oil left in the ground

413 tree seedlings planted

16 tonnes of greenhouse gases saved

6 cars off the road
