PREDICTED COST SAVINGS

\$14,744 p/a

Based in Melbourne, Toy Kingdom understands the value that quality lighting adds to their business.

They want their customers to feel welcome and comfortable in their store while displaying their products in the best light.

So, Toy Kingdom made the decision: it was time to move to LED. They selected Energy Makeovers to complete their LED upgrade, and we were ready for the challenge.

CHALLENGE & SOLUTION

With a busy store, Toy Kingdom needed as little disruption to their business as possible. Energy Makeovers came in and completed the installation quickly and quietly.

During the project, 59 lights were upgraded, which created 1,263 VEECs and abated tons of carbon.

The best part is that Toy Kingdom can now expect to see savings of \$14,744 a year or \$73,721 over 5 years!
